MSRIT Department of Computer Science & Engineering

Academic Publication Portfolio & Analytics Report — Dr.Monica R Mundada

Generated on: 2026-07-28 08:26:53 UTC

Faculty Profile & Identifiers

Author Name:	Dr.Monica R Mundada	**Department:**	Computer Science & Engineering
Scopus ID:	55532875100	**Scholar ID:**	_gNJRewAAAAJ

Portfolio Metrics Summary

Total Publications	Total Citations	h-index	i10-index	Verified Scopus	Journal / Conf

Complete Publications Inventory (Top 40 Displayed)

#	Title	Year	Journal / Conference	Quartile	Cites	Verified
1	A study on energy efficient routing protocols in wireless sensor networks	2012		N/A	115	NO
2	Predictive analysis to improve crop yield using a neural network model	2018		N/A	58	NO
3	Mayfly taylor optimisation■based scheduling algorithm with deep reinforcement learning for	2022		N/A	47	NO
4	Early prediction of chronic disease using an efficient machine learning algorithm through	2021		N/A	39	NO

5	Energy aware multi-hop multi-path hierarchical (EAMMH) routing protocol for wireless senso	2012		N/A	35	NO
6	Design of a smart water-saving irrigation system for agriculture based on a wireless senso	2018		N/A	31	NO
7	Analysis of agricultural supply chain management for traceability of food products using b	2020		N/A	30	NO
8	Deep learning-based resource prediction and mutated leader algorithm enabled load balancin	2023		N/A	29	NO
9	Design and development of efficient techniques for leaf disease detection using deep convo	2020		N/A	27	NO
10	The resource allocation using weighted greedy knapsack based algorithm in an educational f	2022		N/A	22	NO
11	Clustering in wireless sensor networks: performance comparison of EAMMH and LEACH protocol	2013		N/A	15	NO
12	Energy efficient clustering and grid based routing in wireless sensor networks	2012		N/A	15	NO
13	Enhanced deep feed forward neural network model for the customer attrition analysis in ban	2019		N/A	13	NO
14	A survey of congestion in Wireless Sensor Networks	2016		N/A	12	NO
15	A systematic review web content mining tools and its applications	2021		N/A	10	NO
16	Iot based bus transport system in bangalore	2015		N/A	10	NO
17	Optimized Farming: Crop Recommendation System Using Predictive Analytics.	2023		N/A	9	NO
18	Skin cancer prediction by incorporating bio-inspired optimization in deep neural network	2024		N/A	8	NO
19	Machine Learning-Based Approach for Predictive Analytics in Healthcare	2022		N/A	8	NO
20	ZigBee Based Wireless Sensor Networks in Precision Agriculture-The Survey	2015		N/A	8	NO
21	Hybrid generative regression-based deep intelligence to predict the risk of chronic diseas	2022		N/A	7	NO
22	A hybrid approach of deep learning with cognitive particle swarm optimization for the big	2018		N/A	7	NO
23	An efficient framework for web content mining systems using improved cd-pam clustering and	2023		N/A	6	NO
24	Meeradevi (2018) Predictive analysis to improve crop yield using a neural network model			N/A	6	NO

25	Survey on congestion control approaches in 4g/5g cellular networks	2022		N/A	5	NO
26	Optimized deep neural network based predictive model for customer attrition analysis in th	2020		N/A	5	NO
27	Decision support system to agronomically optimize crop yield based on nitrogen and phospho	2019		N/A	5	NO
28	Botnet forensic analysis in software defined networks using ensemble based classifier	2022		N/A	4	NO
29	Secured communication strategies for internet of things sensors	2021		N/A	4	NO
30	Meeradevi. 2018.” Predictive Analysis to Improve Crop Yield Using a Neural Network Model”			N/A	4	NO
31	Hybrid decision support system framework for enhancing crop productivity using machine lea	2022		N/A	3	NO
32	Digital watermarking to protect deep learning model	2021		N/A	3	NO
33	Automation framework development for continuous integration and deployment in CT machines	2018		N/A	3	NO
34	Localisation technique for wireless sensor networks	2015		N/A	3	NO
35	Application of flood catastrophe model to estimate revenue and insurance losses under unpr	2024		N/A	2	NO
36	Internet of things (IoT) for secure data and M2M communications—a study	2022		N/A	2	NO
37	Recursive subspace based feature selection approach for early risk prediction of chronic d	2022		N/A	2	NO
38	Detection and classification of leaf disease using deep neural network	2022		N/A	2	NO
39	A survey on providing security to the wireless sensor networks integrated with IoT	2014		N/A	2	NO
40	Comparison of energy efficient clustering protocols for heterogeneous wireless sensor netw	2013		N/A	2	NO
